[·] A Private Placement is a sale of stock shares or bonds to pre-selected investors and institutions rather than on the open market.

Multi-Family Residential Mortgages are loans secured by housing units in structures with five or more units.
 Commercial Mortgages are loans secured by non-farm non-residential properties, such as office buildings, retail stores, and industrial facilities, as well as construction and land development loans associated with commercial properties.
 Farm mortgages are loans secured by farm properties. In terms of residential real estate, a farm is on a property that generates at least \$1,000 in income from agricultural products. Farm mortgage debt is considered a liability of the non-financial corporate and non-financial non-corporate business

[•] Construction and Land Development - Represents loans secured by real estate with maturities of 60 months or less made to finance land development or the on-site construction of industrial, commercial, residential or farm buildings. Includes new construction, additions or alterations to existing structures and razing existing structures to make way for new structures.

⁻ Federally managed student loan portfolio Includes outstanding principal and interest balance of Direct Loans and ED-held FFEL Program Loans; Total Federal Loans include Direct Loans, FFEL and Perkins Loans.

^{*} Delinquent loans (90+ Days) as a percentage of total outstanding loans

^{**} Delinquent loans (90+ Days) as a personage of outstanding loans in repayment status

• Delinquency Demographics for Federal Loans have been delayed until March 31, 2022, the first quarter for which borrowers can be delinquent

• Private Student Loans by Status represents a breakdown of Measure One Private Student Loan Report Contributors balances.

Counterparties	\$ in billions	\$162	\$253	\$187	\$165	\$157

<sup>The credit risk in a derivative contract is a function of a number of variables, such as whether counterparties exchange notional principal, the volatility of the underlying market factors (interest rate, currency, commodity, equity, or corporate reference entity), the maturity and liquidity of the contract, and the creditworthiness of the counterparty.

Gross Positive Fair Value - The total of all contracts with positive value to the bank. GPFV is the initial measurement of credit exposure of banks</sup>

and savings institutions.

Gross Negative Fair Value - The total of all contracts with negative value to the bank. GNFV represents the level of exposure the banks pose to

their counterparties.

Net Current Credit Exposure = GPFV less the dollar amount of netting benefits with a specific counterparty.
